

Products & Services Available

Voice Solutions

Reliable, state of the art, Voice Services delivered over a private network that is monitored for security & quality assurance

Hosted PBX

Target Market

Benefits

Reliable alternative to expensive PBX or Centrex Lines. A hosted PBX phone system allows you to take advantage of PBX functionality that is traditionally reserved for large corporations.

- Start up company with limited capital budget
- Small business office with professionals working remotely
- Businesses with multiple locations (showrooms/small offices)

- Minimize upfront costs - reduce your current non IP phone bill by 20%-40%
- Add additional phones, extensions & call handling online
- Save on maintenance costs: engineers support your PBX system

IP PBX

The next generation in business phone systems. The IP PBX system allows you to retain your current service while upgrading your phone hardware.

- Small to medium businesses that require 15+ phones & have the potential to expand
- Businesses that require customized features to suite their telephony needs

- Reduce costs, a software based IP PBX phone system is less than a hardware based PBX system
- Flexibility & administration control
- Customized features
- Add additional phones & lines
- Engineers support your PBX system

T1 PRI Voice Hand-Off

Utilize your existing phone hardware, with improved service that allows your current phone system to be configured through your computer network.

- Small to medium businesses looking to significantly reduce voice service costs without disrupting normal business operations

- Reduce your phone bill
- Extend the life of you current PBX system
- Take advantage of technological advancements & improved service without the outlay for new equipment
